OVERALL RISK RATING

HIGH

Summary of findings

The risk profile of VOLKSWAGEN AKTIENGESELLSCHAFT is categorized as high overall, concerning public relational vulnerabilities and serious documented controversies cited in analyst reports. Additionally, there are concerns about substantial anti-bribery safeguards paired with considerable government influence potentially affecting international partnerships. Beyond this, our evaluation found critical governmental connection indicators raising questions about decision independence. Regarding other risk factors, the entity's social governance framework and cybersecurity posture both present moderate concerns. These findings necessitate thorough monitoring and stringent control measures.
